## Partner with Citynet to provide your customers' carrier grade, reliable VoIP phone service.

Citynet is proud to present its Digital Phone Partner Program - A program that enables Cable Operators, CLECs, IXCs, and other service providers to deliver digital phone without the major investment or resource requirements. Partnering with a first class phone services and IP network provider is the first step in ensuring the success of your phone launch. Citynet is that provider - offering private label hosted IP (SIP) telephony over its integrated, highly redundant network and systems architecture. By combining a tried and tested VoIP platform with an unsurpassed customer and reseller interface, Citynet provides the most efficient and easy to use VoIP phone service in the market place. Don't get left behind as VoIP revenues are projected to soar to \$9 Billion by 2009. Citynet's completely hosted solution provides for a quick, painless launch so your business gets its stake in the Digital Phone Revolution.

### "Control" Your Destiny

Serve residential AND business customers with all the features and functions imaginable...all at very competitive rates. There are no hidden charges for voice mail, auto attendants, phone numbers, number porting, or other services. We make launching and managing your new phone service easy through our simple flat rate pricing plans. The administrative web portal allows partners to provision accounts, control inventory; manipulate service features, view management reports, and more...all with the click of a mouse. Provide your customers with unlimited local and long distance calling and all the features they desire for one simple low monthly fee.

## Empower Your Customers

Your customers now control **How**, **When**, and **Where** their phones ring through your branded web portal. There, customers control their phone service from A to Z. Listen to voice mails, create custom incoming call plans, create auto-attendants, and much more...all from a single easy-to-use customer interface. A free virtual attendant console provides real-time visibility of your customers accounts with live dial and transfer options. Customers can download custom or general call detail reports complete with daily, weekly, monthly, or annual usage graphs. Empower your customers by providing complete control to their accounts without the hand-holding!

## A Proven Platform

Citynet uses a tried and trusted custom SIP based platform that integrates with its existing PSTN and IP backbone networks to provide carrier grade phone services. The Citynet platform provides scalability to meet your growing demand without limitations or delays experienced with traditional providers. Deliver services with confidence to your residential or SOHO, SMB, and large business customers with the reliability expected of a traditional phone service.

Residential or commercial, Citynet understands the demands of your customers and brings reliability and peace of mind by providing a proven system that works as advertised. Citynet's system is compatible with many different, certified termination devices and we will work with your company to certify any new desired equipment.

**Digital Phone made easy...Citynet provides a turn-key solution to its partners allowing for quick and seamless service deployment, while providing partners the necessary tools to succeed.**
